These include your blood pressure, heart rate and metabolism. As thyroid cancer progresses, however, there are several significant symptoms that you may begin to notice — and that can alert you to the presence of this disease. If you’re experiencing breathing difficulties, contact your doctor right away. Thyroid cancer is a condition that occurs when abnormal cells develop in your thyroid. If you have hoarseness due to thyroid cancer, you may also experience other vocal changes, such as changes in the pitch or tone of your voice. Swollen lymph nodes in your neck A change to your voice, including hoarseness, is another common symptom of thyroid cancer that often occurs in its later stages. As thyroid cancer progresses, you might experience severe neck pain that also develops in your ears. Thyroid cancer can be slow-growing, and it may not cause noticeable symptoms in its initial stages. Swollen lymph nodes in your neck can also indicate thyroid cancer, especially if the glands aren’t tender to the touch. This symptom is often what causes people to seek medical attention. While neck and ear pain can happen with less severe conditions such as an ear infection, it’s always important to make an appointment with your doctor if these symptoms don’t go away quickly. Changes in your voice. The hormones that your thyroid gland produces help regulate several of your bodily functions. Swollen lymph nodes in your neck often occur when your body is responding to an illness or infection, so it can be difficult to determine the underlying cause when you don’t have other obvious symptoms. The swelling or presence of a lump may also make it difficult to swallow. Neck or ear pain. These include low levels of iodine in your body, your assigned sex at birth and whether or not you’ve had radiation treatments. The most common symptom of thyroid cancer is swelling or a lump in your neck area surrounding your throat. If you have persistently swollen lymph nodes, let your doctor know so you can get a diagnosis. Breathing difficulties or noisy breathing. Continue reading to learn more about the signs and symptoms of thyroid cancer. Vocal hoarseness from thyroid cancer isn’t associated with the common cold or flu, and it doesn’t cause respiratory symptoms. When thyroid tumors grow large enough to press against your windpipe, breathing difficulties and noisy breathing can occur.
